Dear Dan,

**Level Crossing closures on the Anglia Route**

XC Trains Ltd is supportive of Network Rail's efforts to reduce the risk arising from level crossings on Anglia route, and will work with them to process closures via the normal process of Network Change. Closure of level crossings is one of the most significant ways in which the risk to our passengers and staff from collisions can be reduced. We also consider that the proposals, when implemented, will lead to increased reliability and efficiency for the railway industry, and could assist with future improvements such as journey time reductions.

Kind regards

Joanna Davey  
Head of Track Access and Possession Strategy
