

7<sup>th</sup> September 2018

Since making the application for the above Order, Network Rail and their agents have continued to engage with landowners affected by the crossing proposals.

In relation to the level crossings listed below, Network Rail has agreed with the landowner to change the route of the proposed footpath diversion as shown in the replacement plans below. For information please also find the original plan as submitted.

Please note that the proposed replacement plans may in some cases look different to those submitted aside from the route change described above: a data error affecting the positioning of public rights of way on the Definitive Map and the associated Order reference "P" points on the original plans has been corrected.

The proposed plan amendments will be formally submitted to the public inquiry, which is due to resume on Tuesday 25 September.

As you have made an objection or representation with regards to this level crossing proposal, we write to inform you of the proposed change. If you have any comments on the proposal, please could you send these to the Programme Officer for the Inquiry by **Monday 24 September 2018** on the details below:
