RECEIVED

To Who Ever it may Concern

I write to you in **support** of the M4 Corridor Around Newport Scheme, as someone who commutes from Portishead to Cardiff every day I truly understand the need for this scheme. Every single morning I sit in traffic going through the Brynglas tunnels and likewise on the way home it queues from junction 28 to the tunnels adding at least 15 to 20 minutes to my journey home.

My commute is the better way of doing the journey for all those people that do it the other way from Wales to England the traffic is horrendous. Every morning as I drive pass them all in slow moving traffic which stretches from Magor all the way to junction 28 and further on bad days and in the evenings it's probably even worse with slower if not stand still traffic over majority of the same area, probably even stretching as far as the tolls (definitely on Fridays)?

For anyone who is opposed to the scheme you should get them to commute Wales to England and back again every day and they will soon realise the issues this scheme is trying to resolve and how these will definitely out way the negatives.

My comments are just from a commuter's point of view but I can't see how this scheme isn't a positive as a whole especially for the economy of Newport and the rest of South Wales as good transport links will always improve an economy and attract new investments.

Yours Sincerely,

Tim Morant
