Dear Sir/Madam

Thursday the 31st March I viewed the M4 corridor proposal around Newport and I was most impressed.

The thought and consideration of all the important points deserves some praise for all concerned.

I liked the fact that relatively few properties would be demolished and that suburban areas are avoided as much as possible as I consider noise pollution a real problem. Also places of scientific interest are minimally effected as the motorway is placed in the margins of such areas and as for the Docks, sadly the North Dock will be restricted but I understand that there is capacity in the South Dock for vessels unable to proceed to the North.

Best of luck to all concerned Wales desperately needs excellent road and railway links to the rest of Britain for the good of industry which will then benefit everyone living here.

Yours faithfully
