Dear Sir or Madam

I recently visited the exhibition for the new M4 Motorway, South of Newport.

I was extremely impressed with it and it will be a vital link to Wales by by-passing the bottleneck of Newport which has always been the cause of many excessive hold-ups. This has caused many important delays to travellers and industry with a loss of vital Trade for Wales. I say this because I am sure that Company's will avoid Wales due to the poor link here at Newport. With this new excellent link Wales can only benefit

With current Steel Crisis it emphasises this importance all the more.

I sincerely hope that all the Politicians of Wales agree to this. If they do not I see Wales prosperity for the future failing.

This new project must surely be for the future of the next 50 years or more which will help our younger generation prosper.

Yours Faithfully,

Bryan Lawrence
