Dear Sir

### **M4 Corridor around Newport**

I am writing regarding the proposal for the new M4 Corridor around Newport (CAN). I wish to express my **total support** for the Welsh Governments proposals as published for the new M4 motorway.

I am a regular user of the M4 for both personal and business use. The delays that occur on the current M4 north of Newport between Junctions 28 and 24 are excessive at all times of the day. The queues cause massive disruption to the working day (particularly with the current reduced speed limit in this area), and cost businesses in south Wales millions of pounds.

The safety of the road for users would also be significantly improved with the new M4 motorway bringing further business in to South Wales and the surrounding valleys.

I sincerely hope that the scheme will progress successfully through the remaining statutory process to construction as I am aware of the current proposals and the commitment to the environmental matters and agree with the mitigations currently proposed.

Yours faithfully

Amy Dixon
