To whom to may concern

M4 Corridor around Newport

I am writing with regards to the proposal for the new M4 Corridor around Newport (CAN)

I wish to express my total support for the Welsh Governments proposals as published for the new M4 motorway

I live in Bristol but work in mid Wales and therefore my support is given to this scheme due to the delays that currently occur on the current M4 north of Newport between Junctions 28 and 24 being extremely excessive, I spend an extortionate amount of my working day stuck in traffic around this area. The queues cause massive disruption to all who use this part of the motorway and must cost businesses in south Wales millions of pounds. The traffic jams create a significant safety risk in terms of the accidents that the queues cause and disruption for the emergency services.

This M4 CAN scheme is long overdue and in my view will be massively beneficial to all current road uses and also to the businesses in South Wales. It will also promote new businesses to locate in South Wales if they know they will have good traffic route between Wales and England without the hardship of constant traffic jams.

I sincerely hope that the scheme will proceed and look forward to a much more beneficial and safe route into and out of Wales.

Yours faithfully

Mrs Michelle Parsons
