

I would like to register my support for the proposed M4 Corridor around Newport.

The proposed motorway would provide many benefits to the south Wales region which would align with the economic and growth aspirations of the Cardiff City Region. The current M4 at Newport is insufficient and often there are lengthy delays which highlight its ineffectiveness. The location of the new M4 CaN has been carefully considered and is proposed in a location that would have least impact on its surrounding environment when weighing up the three pillars of sustainability (environment, social and economy).
