

Good Afternoon,

I am writing to enforce my support of the Welsh Governments Black Route.

I am a frequent traveller to Cardiff through work and through family commitments and I can definitely say that the proposed black route would be incredibly beneficially not just to myself but to thousands that travel this route daily – implementing this idea would cut transport times dramatically for all users and be of a huge benefit to the Welsh economy.

I strongly agree that this project should not be held up nor should it be cancelled, I can't stress enough how important this relief road would be for the whole of South Wales. The travel times for all users have a major effect on their daily lives – releasing the congestion would massively benefit families and businesses alike.

I hope you take my opinions into consideration – I am not a daily user of this road network but I do travel frequently along it and I can see how much this relief road is needed I can only support the opinions of those that have to go through this journey daily. I can only hope that this plan is given the full support it needs and is completed successfully.

Thank You,

Jack Lewis
