Dear Sir,

I am writing in relation to the M4 Corridor around Newport. I live in the Rhondda Valleys and often use the M4 for social and business purposes. Having read the literature regarding the project I strongly believe the black route is the most sensible and viable option.

There is an urgent requirement to begin the project to alleviate the congestion. The back route will present an array of benefits to South Wales and I would like to see the project commence as soon as possible.

Yours faithfully

Jade Emanuel
