Dear Minister,

As the CEO of a construction materials business with a number of important manufacturing locations in Wales, I am writing to express my full support for the recently published route for the M4 Corridor scheme around Newport.

The current M4 through Newport is proving to be a major constraint on our business, causing late deliveries and increased transport costs, with the Brynglas Tunnels a particular and severe bottle neck.

The proposal for this new section of motorway offers a sustainable, long-term solution to the problem. It will also provide a major boost for our business as we are particularly well placed to supply the raw materials required to build the new road. That in turn will have benefits for the local economy and for jobs and I look forward to the plans becoming a reality.

Yours sincerely,

Daniel Cooper
CEO – Hanson UK
