Subject: Formal Objection

Both myself Matthew James Curtis and Nicola Dianne Curtis of

Little Horwood
Bucks

(OX16)

would like to formally object, On the behalf of ourselves and young family, to plans to make the line carry Dirty Diesel stock, as we do not believe the fact the the line is not going to be electrified as previously planned had been made publicly clear. After reviewing the latest set of plans sent to us on USB stick many of the drawings shown in the plans still show electric trains! We have no issue with the line being electrified and to be run with quieter less polluting electric trains but strongly object to the line being used for Diesel trains within yards of our Recently Converted Property and garden. We also Object to the lack of screening, once present on early sets of plans, as we fear without this we would be overlooked and suffer greater noise and pollution. We politely request for these to be reinstated during works or ideally leave the mature vegetation and tress in place. We also trust we will be kept informed from now on as information regarding this project, which will have a huge impact on our once idyllic lifestyle, has been very sparse.

Yours Sincerely

Matthew James Curtis
Nicola Dianne Curtis
Joshua James Curtis
Mia Nicole Curtis
